SUMMARY

Senior full-stack engineer with 7 years of experience shipping products end to end for US and European clients, working mainly in TypeScript across React, Next.js, Node.js and PostgreSQL: CRMs and sales tools, marketplaces with checkout and payments, back-office consoles, marketing sites and mobile apps. I own features from database schema and API to the UI, including multi-tenant SaaS with row-level security, AI features with LLMs and vector search, and Stripe billing. I work AI-first: I use Claude Code and OpenAI Codex every day, write the spec, split the work into small reviewable tasks, and review every diff myself, catching the agent's mistakes before they reach main. Comfortable picking up new platforms quickly: I have moved between React, Next.js, Flutter, Node.js and .NET as each product required.

SKILLS

Frontend: React, Next.js (App Router, Server Components), TypeScript, JavaScript, HTML, CSS, Tailwind CSS, MUI, Mantine, shadcn/ui, Zustand, Redux Toolkit, TanStack Query / Router / Table, react-hook-form + Zod, i18n, responsive UI, design systems, performance optimization

Backend & data: Node.js (Express, Fastify, NestJS), ASP.NET Core, PostgreSQL (row-level security, pgvector), Drizzle ORM, Supabase, Firebase

CRM, commerce & integrations: CRM and sales-pipeline tools, LinkedIn prospecting, checkout and payment flows (Stripe subscriptions, prepaid credits, marketplace fees, refunds), REST APIs, webhooks, OAuth (Google, Microsoft, LinkedIn), Azure AD / MSAL, Clerk, real-time with WebSockets / socket.io, Twilio, Retell voice agents

AI-assisted development: Claude Code, OpenAI Codex, agentic coding workflows, spec-driven task breakdown, rigorous review of AI-generated code, LLM features (CV parsing, embeddings, ranking, prompt generation with Gemini and Claude)

Platform: AWS (RDS, S3, SES), Google Cloud, Cloudflare Workers, Azure Static Web Apps, Docker, Git, GitHub Actions and Azure Pipelines CI/CD

Mobile: Flutter / Dart (BLoC, Riverpod), apps published on the App Store and Google Play

EXPERIENCE

QA-BIT / Top Dev Crew (Estonia · USA, remote) — Senior Software Engineer Jun 2022 – Present

Top Dev Crew is the US company launched by the QA-BIT team in Sep 2025; same team, same projects.

- **RealCRM:** built an agent-first CRM from scratch: React + TypeScript frontend with eleven agent screens generated from the design mockups, and a Fastify + Drizzle + PostgreSQL API with multi-tenancy enforced by row-level security, OAuth tokens encrypted with a key manager, audit trail, data-retention sweeps and Clerk authentication.
- **TopDevCrew Talent Pool:** internal recruiting platform: operators upload CVs that are parsed with Gemini and embedded with pgvector, create job openings from pasted text, rank the candidate pool against each job, run an AI kit per candidate and job, and share anonymized PDF reports. React 19 + TanStack Router/Query + Tailwind on the frontend, Express + TypeScript on AWS (RDS, S3, SES).
- **LinkFlow:** LinkedIn prospecting and outreach tool with prospect lists, prospect detail pages, automated message sequences and dashboards: React + TypeScript, Redux Toolkit, Mantine, Google / LinkedIn / Microsoft sign-in, CSV import and multilingual UI.
- **WeTrust (originally PalmLine):** managed bilingual (English/Spanish) AI voice receptionist for appointment businesses. Built the Next.js operator console with a config-driven onboarding wizard (business profile with map picker, voice persona with audio preview, services, hours, calendar connection, AI-generated agent prompt, phone number, in-browser test call), the Next.js customer portal and marketing site, and the Fastify API that orchestrates Retell.ai, Google and Microsoft calendars, Twilio SMS and Stripe subscriptions.
- **Mergejob:** AI job-matching platform that ranks listings by fit with the candidate's CV: Next.js 16 frontend (React 19, TanStack Query, shadcn/ui), Supabase/PostgreSQL with pgvector, a Node.js matching worker, Cloudflare Workers for LLM calls, and a credits paywall on Stripe, plus a B2B portal for companies. The product was later discontinued.
- **Alpha Brokers insurance re-rating platform:** frontend developer on a React + TypeScript app (MUI, Zustand, Azure AD sign-in): parallel requests to several rating APIs, results kept in a segmented global store, and the user notified and redirected when all finished, without blocking the UI.
- **Loyalty & cashback proof of concept:** Next.js back office integrated with the API (TanStack Query and Table, Zod forms, Recharts, Mapbox), customer web portal and Flutter app with Supabase auth, for coupons, cashback and purchases with stock reservation.
- **Elzaburu trademark-similarity tool:** contributed to the React 19 + TypeScript frontend (MUI, Zustand, Azure AD / MSAL, real-time updates over socket.io, hexagonal architecture per feature), deployed to Azure Static Web Apps.
- **Company websites:** built and maintain the Top Dev Crew and QA-BIT marketing sites (React, Vite, Tailwind, bilingual English/Spanish, SEO metadata, responsive), plus a gallery of twelve navigable redesign proposals the team used to choose the new direction.

- **All In Biking:** de-facto tech lead of 6 developers on a cyclist social network with an in-app marketplace (per-sale platform fee, refunds and returns), chat, maps, video and real-time features (Flutter, Firebase, Google Cloud), including the shared UI kit and core modules.
- **EduQ:** AI learning and exam-preparation app published on Google Play (Flutter, Riverpod, Clean Architecture, Firebase).

AstroCode (own studio, side projects) — Founder & Full-Stack Developer Aug 2025 – Present

- **Chrona:** multi-tenant appointment booking SaaS (Next.js frontend, NestJS API).
- **Manitas:** two-sided marketplace for local repair services: React admin back office, ASP.NET Core 8 API on PostgreSQL, Flutter app; six languages.

ProDev Solutions LLC (Tampa) — Senior Full-Stack Developer Sep 2019 – Jun 2023

Part-time from Jun 2022.

- **Follow App:** app for Catholic communities with courses, events, donations and live-streamed Masses (Flutter, NestJS, Firebase), published on the App Store.
- **SnapnFund:** receipt-scanning donation app with OCR, used by thousands of users (ASP.NET Core, Firebase, Flutter).

NetForemost — Frontend Developer (Part-time) Mar 2022 – Jun 2022

- **TimeForemost:** enterprise time-tracking platform; built the web and mobile frontend (Flutter Web).

EDUCATION & LANGUAGES

B.Sc. Computer Science — Universidad Central "Marta Abreu" de Las Villas (UCLV), Cuba · 2013 – 2018

Spanish: native · English: professional working proficiency
